EDUCATION

University of Toronto

Honours Bachelor of Science Aug 2024 – Present (Expected June 2028)

Specialist: Actuarial Science | **Minors:** Statistics & Mathematics

Relevant Courses: Risk Theory, Life Contingencies, Regression Analysis, Financial Mathematics, Probability Theory, Mathematical Statistics, Data Analysis.

Exams: Sitting for SOA Exam FM (Dec 2026)

Awards: The International Merit Admission Award.

INTERNSHIP EXPERIENCE

Zheshang Futures Hangzhou, China *Summer Research Intern July 2026 – Aug 2026*

- **Engineered** automated Python web scrapers to efficiently extract and process national macroeconomic data, significantly accelerating the research team's data collection pipeline.
- **Formulated** and tested quantitative trading models utilizing futures basis factors, analyzing complex commodity price movements to identify potential arbitrage opportunities.
- **Presented** data-driven strategic market analyses and simulation trading results to senior management, demonstrating robust proficiency in financial engineering and risk management frameworks.

PROJECT EXPERIENCE

Aliyun Tianchi Data Mining Project

- Conducted comprehensive feature engineering and Exploratory Data Analysis (EDA) on high-dimensional business datasets utilizing **Python (Pandas, NumPy, Seaborn)** to extract hidden data patterns.
- Developed and fine-tuned predictive machine learning models using **Scikit-learn** and **XGBoost**, optimizing hyperparameters to maximize predictive accuracy for complex business scenarios.

Wellspring Community Impact Data Analysis

- Executed rigorous data cleaning and multivariable regression analysis to evaluate community impact, leveraging **Python (Statsmodels)** and **R (dplyr)**.
- Engineered clear, data-driven visualizations utilizing **R (ggplot2)** and **Python (Matplotlib)** to translate complex statistical trends into actionable insights for non-technical stakeholders.

SKILLS

Programming: Python, R, Excel

Technical Skills: Derivative Pricing, Quantitative Strategy, Statistical Modelling, Risk Theory.

Languages: Chinese (Native), English (Fluent, IELTS 6.5)
