EDUCATION

University of Toronto Toronto, ON *Honours Bachelor of Science Aug 2024 – Present (Expected June 2028)*

- **Specialist:** Actuarial Science | **Minor:** Statistics & Mathematics
- **Relevant Courses:** Probability Theory, Mathematical Statistics, Life Contingencies, Stochastic Processes, Regression Analysis, Financial Mathematics, Risk Theory, Data Analysis.
- **Awards:** The International Merit Admission Award.

INTERNSHIP EXPERIENCE

Zheshang Futures Hangzhou, China *Summer Research Intern July 2026 – Aug 2026*

- Engaged in an intensive quantitative trading workshop, focusing on derivative pricing models and risk management frameworks.
- Conducted hands-on simulation trading, analyzing commodity price movements and refining algorithmic trading decision-making.
- Collaborated on research projects and presented strategic market analyses, enhancing proficiency in financial engineering and data-driven market assessment.

PROJECT EXPERIENCE

Aliyun Tianchi Data Mining Project

- Performed feature engineering on large-scale business datasets using Python; applied EDA techniques to identify patterns in high-dimensional data.
- Fine-tuned model parameters to optimize predictive accuracy for specific business scenarios, demonstrating logical problem-solving skills.

Wellspring Community Impact Data Analysis

- Analyzed community impact through data cleaning and regression analysis in Python and R; designed visualizations to communicate key trends to stakeholders.

SKILLS

- **Programming:** Python, R, Excel
- **Technical Skills:** Derivative Pricing, Quantitative Strategy, Statistical Modelling, Risk Theory
- **Languages:** Chinese (Native), English (Fluent, IELTS 6.5)
